

acetylated

Acetylated Lanolin

Lanolin subjected to an esterification process with acetic acid, which reduces the amount of free alcoholic groups (hydroxyl).

Approval specifications

Appearance:	unctuous, yellowish
Color Gardner:	11 max USP
Hydroxyl index:	5.0 max USP
Melting point:	30 - 40 °C USP
Acidity index:	3,0 max USP
Saponification index:	180 - 200 USP
Iodine index:	8,0 - 12,0 USP
Humidity (drying loss)	0.25 % max USP
Saponication index :	110 - 130 USP
Hydroxyl Index:	10 max USP

Uses

Cosmetic, formulations of low allergenicity
